Where we have identified improvements and immediate concerns during our inspection which require the service to take action, these are detailed in the appendices of the full inspection report.

When we identify concerns that pose an immediate risk to patient safety we ask the service to undertake urgent action. These concerns are outlined in the appendices and outline the action taken by the service to protect patient safety and approved by us. We also provide a detailed table of improvements identified during the inspection where we require the service to tell us about the actions they are taking to address these areas and improve the quality and safety of healthcare services. In addition we outline concerns raised and acknowledge those resolved during the inspection.

At the appropriate time HIW asks the service to confirm action has been taken in line with management responses documented in the improvement plan. We also ask service to provide documented evidence of action taken and/or progress made.
